The Experience

Pests are more than annoying; they can pose serious risks to your health and property. The POM extensive training and advanced technology focus on attacking any pests already in your home, office, store, or restaurant and breaking the pest lifecycle to help control unwanted invaders in the future.

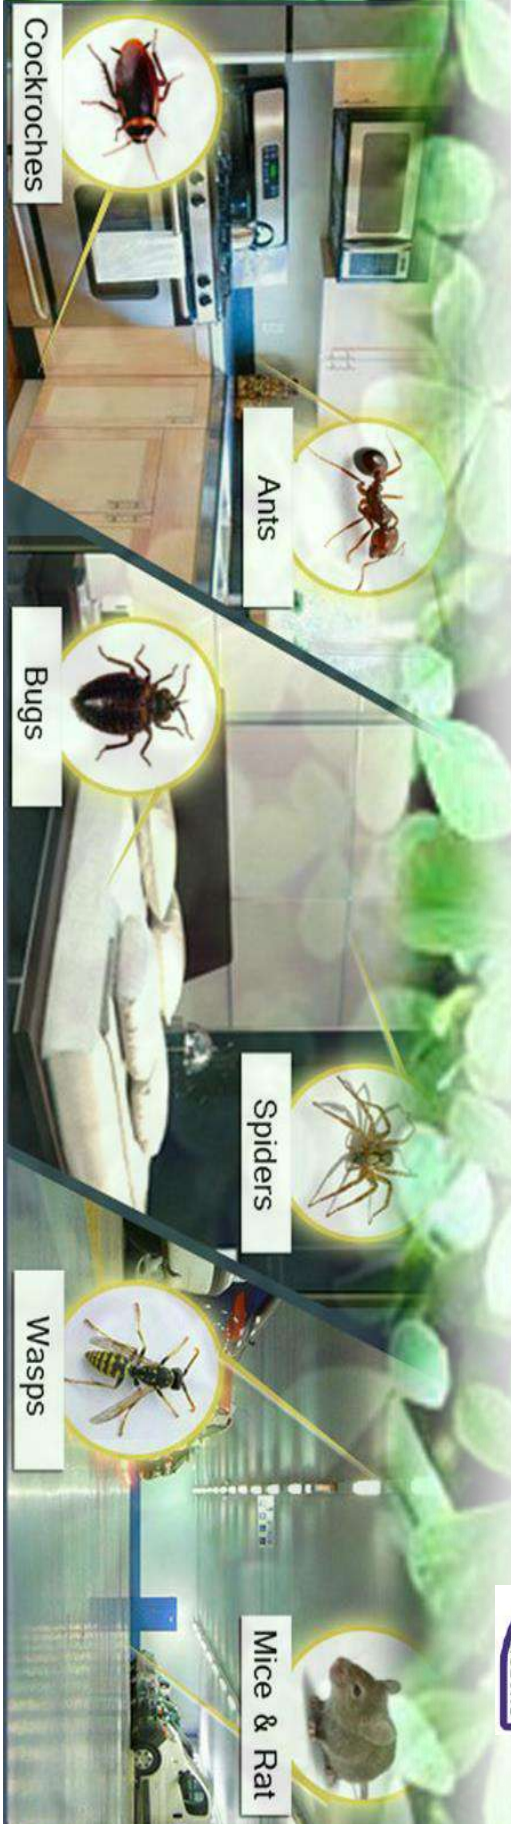

Not all pest problems are the same, and not all homes need the same types of treatment. POM personnel are trained to identify and treat the root of your particular pest problem. Upon thorough inspection, they will create a customized treatment plan that effectively targets pest problems exactly where they appear in your premises – both inside and out, all year long.

Why Pest Control?

Pests are dangerous and in most cases visible but sometimes invisible, therefore it is important that precaution and regular control is needed.

Pests can:

- ✓ Spread germs
- ✓ Increase allergies
- ✓ Transmit diseases
